

Meet Sam.....

Sam, from Mt. Pleasant High School, is spending this summer in the Work4College (W4C) Program assisting the Physics instructors in the lab. Because of his unique computer skills he is also **building** a 3-D printer for the college! **From scratch!** For his community service project he is teaching younger students in the kids camp how to print on 3-D printers. Sam will finish his Associate's Degree and leave NTCC next year to pursue a Bachelor's Degree in Mechanical Engineering. And, he will leave NTCC DEBT FREE!

DID YOU KNOW??? All students in the program are required to do community service and they are all required to attend a class each week. Some of these classes include the following:

Financial Literacy - Everything from how to write a check to learning how much a \$30,000 student loan will affect them later in life.

Gratitude - They write hand written thank you letters to their sponsors.

Resume Writing and Career Assessments.

Ethics, Morals, and Values.....and so much more.

The W4C Program is making a difference in their lives and in our community!
